Review Targets on Hungary

REF : St/I Office Notice No 194, 9 September 1958

25X1A8a

Below is the S/CST Contribution to the Review of [REDACTED] Target List  
on Hungary:

#### Background

Omit background information and replace with the following:

The reduced output and the urgent consumer requirements incident to the 1956 revolt has resulted in a sharp drop in the originally planned aggregate investment for the Second Five Year Plan (1956-60.) The latest plan calls for a capital investment expenditure of 32 billion forints for the last three years of the Second Five Year Plan. When this sum of 32 billion forints is added to the 21.3 billion forints already expended in 1956 and 1957, the total capital investment for the Second Five Year Plan will amount to 53.3 billion Forints. This is 20% below the actual investment of the First Five Year Plan and 30% below the original Second Five Year investment plan. Assuming that the construction industry will receive about 50% of the capital expenditure as was generally the case in previous years, the volume of state construction-installation work by the end of the Second Five Year Plan will amount to 26.5 billion forints. This is 32% below the value of the volume of construction-work of the First Five Year Plan.
